

The Simplest Way to Stop Bacteria and Mold in your Split Air Conditioning System and Your Room

What's in Our Indoor Air? Potential Health Risks.

Mold & Fungi

Mold can exacerbate the symptoms of allergies including **chest tightness, shortness of breath, and wheezing.**

Other symptoms: eye irritation, fatigue, headaches, nasal congestion, and runny nose.

Harmful Bacteria

Bacteria can cause a number of diseases including the potentially fatal **Legionnaires' Disease** from exposure to **Legionella bacteria.**

Viruses

Viruses can exist indoors both in the air and on household surfaces, circulating through untreated AC units.

When left untreated, your air conditioner spreads these invisible bacteria and viruses.

The Visible Outcome of Poor Air Quality:

- **Health Effects:** Ranging from asthma, chronic headaches, fatigue, runny noses, sore eyes, and other respiratory diseases.
- **Odors:** Strong musty odors from bacteria and mold growth.
- **Unightly Stains:** Stains on surfaces, such as ceiling, upholstery, walls, and others.

Benefits

- ✓ **Powerful Action:** Kills bacteria, mold, and viruses.
- ✓ **Air Quality Improvement:** Eliminates odors caused by bacteria and mold and improves overall air quality.
- ✓ **Natural & Patented:** All natural **Australian Tea Tree Oil** delivered via patented controlled and sustained vapor release.
- ✓ **Dual Treatment:** Provides full treatment of **air conditioner unit and the room** that it is in.

Mold and Bacteria Control All Year Round

Gelair™ Health-e SPLIT releases Australian Tea Tree Oil vapor which kills contaminants wherever the vapor is dispersed.

Long Lasting

Lasts from **6 to 12 weeks** depending on the use of the split AC system

Use Anytime

Can still be used when you don't need cooling or heating —just run your split AC system on **fan only.**

Fresh Aroma

The fresh Tea Tree Oil aroma will be stronger at first use and when turning your unit on after a break.

Simple and it Works!

Gelair™ Health-e SPLIT is easy to install and requires **no maintenance**.

1

Unpack

Remove the Gelair™ Health-e SPLIT from the outer foil package.

2

Prepare Unit

Open the front panel of your split AC system and remove the filter.

3

Place Product

Place Gelair™ Health-e SPLIT **between the coil and the filter.**

4

Close Unit

Replace the filter and close the unit. Installation is complete!
