

ECOLO XStreme[®] Vapor System

Industry-Leading Vapor Output for Complex Odor Neutralization

Ecolo's finely machined products provide consistent output of **ultra fine particles** for odor treatment.

- **1 Micron Droplets:** These smaller, lighter, and higher numbers of droplets increase the **opportunities for collision and absorption** between the XStreme[®] Vapor Solution molecules and the odor molecules.
- **Consistent Output:** Developed with pending new patent innovation for reliable, industry-leading vapor output.

XStreme[®] Vapor Units

XStreme[®] Vapor Solutions

A **waterless blend** of Ecolo's patented essential oil technology, designed specifically for these units.

- **Odor Conversion:** Ultra fine particles **neutralize a broad spectrum of nuisance odors** by converting odor molecules into **non-volatile compounds**, dramatically reducing odor concentrations and intensity.
- **Highly Concentrated:** Differentiated from the AirSolution[™] range by being highly concentrated and **requiring no mixing**.
- **Uniform Dispersion:** Ultra-light particles are able to be **easily dispersed uniformly in an enclosed space**.
- **Safety Assured:** Safe to handle and use in areas with human contact.

Complex Odor Compounds Eliminated

XStreme® Vapor Solutions and their complementary units treat a wide range of challenging chemical compounds, including:

- Hydrogen Sulfide
- Organic Acids
- Mercaptans
- Decay Odors
- Reduced Sulfur Compounds
- General Nuisance Odors

Ideal for Extensive Treatment in:

- Trash Rooms / Chutes
- Washrooms
- Kitchen Exhaust Systems
- HVAC Systems
- Hotel Rooms & Public Areas
- Retirement Homes & Hospices
- Kennels & Veterinary Facilities
- Industrial Exhaust Stacks

Also serves in hand with high-end ambient scenting applications.

XStreme® Vapor Unit

| | |
|------------------------|--|
| Size | 449 x 156 x 161 mm |
| Weight | 1.85 kg |
| Capacity | 1L |
| Output | Vapor form |
| Compatible with | AirPro® (directly supports 3 Vapor Units) 1 L solution bottle |

XStreme® Vapor Units use only waterless XStreme® Vapor Solutions.

These powerful neutralizing agents use essential oil technology to combat common odors. They are designed for specific applications but effective on a broad range of problematic odors.

XStreme® Vapor Solutions

8014 – Clean Citrus

8015 – Fresh & Clean

8023 – Southern Breeze

- Vapor mist – with fragrance
- More acceptable for environments with human traffic
- Good ventilation preferred
